#### COMPREHENSIVE BIM SERVICES SINCE 2007

#### **WHO WE ARE**

Established in 2007, Advenser helps construction companies, general contractors, architects & engineers, integrate BIM into their projects seamlessly within their predefined timelines and budget, bridging the gap between concept & constructability.

#### Mission

To provide services to customers globally with cutting edge technologies and grantees cost savings.

#### Vision

To be recognized as a leading Business Process Outsourcing service provider delivering exemplary services.

#### **OUR CLIENT BASE**

### **ADVENSER DIFFERENTIATORS**

**Comprehensive Set Of BIM Solutions** 

System Driven Best Project Practice

State-of-the Art-infrastructure

**Refined Quality Assurance Procedure** 

Scalability & Flexibility Of Resources

**Qualified & Specialized Resources** 

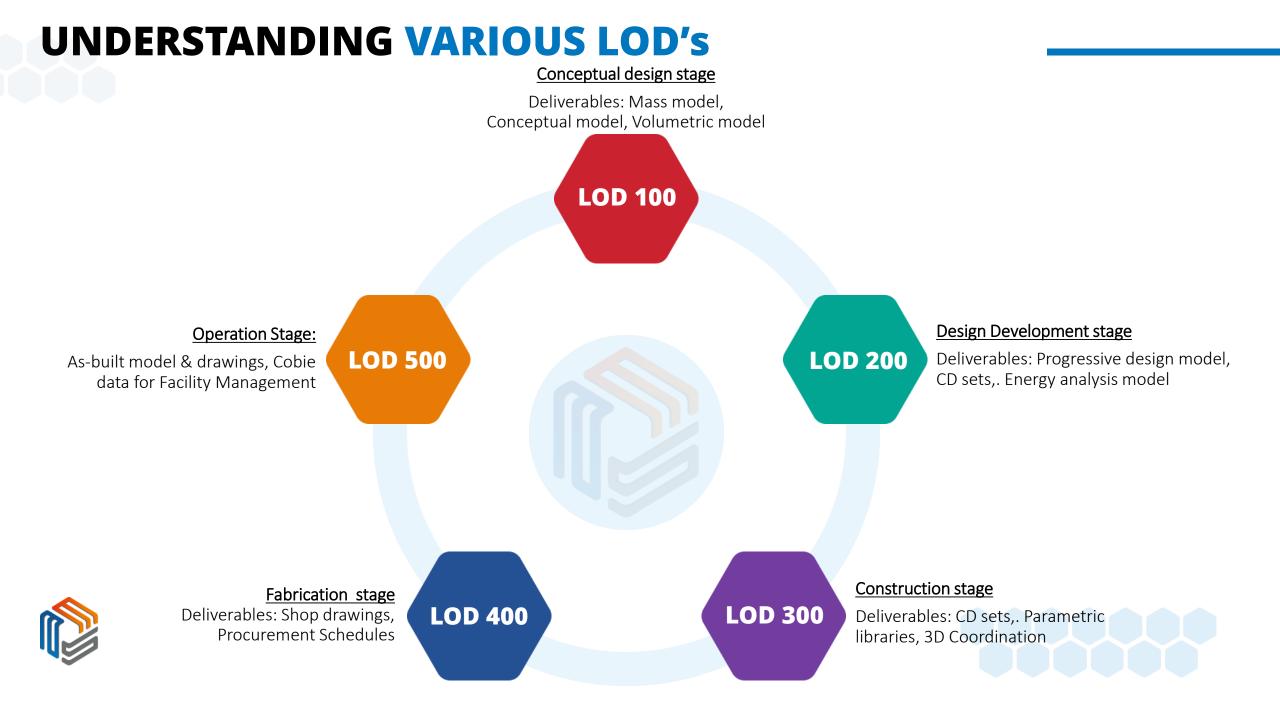

## **OUR ARCHITECTURAL BIM SERVICES**

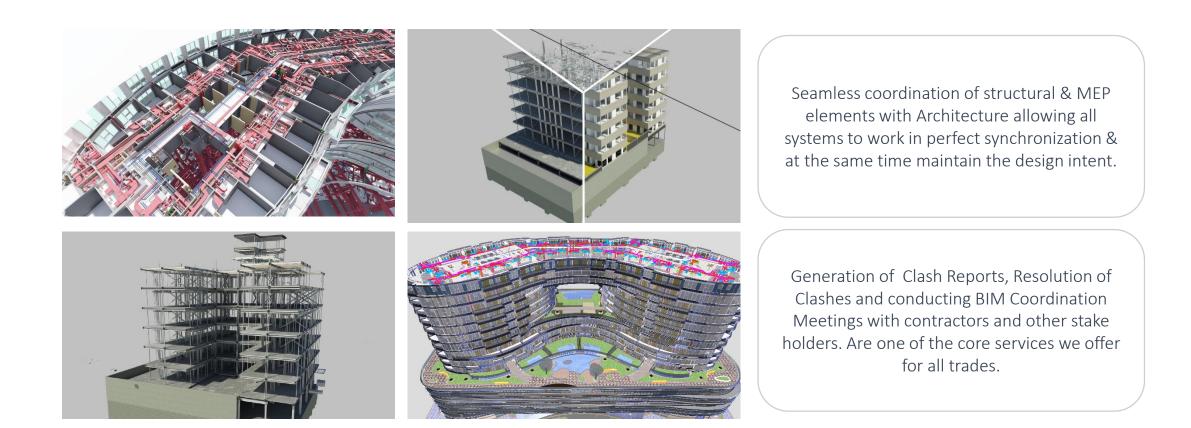

#### **3D MODELING & BIM**

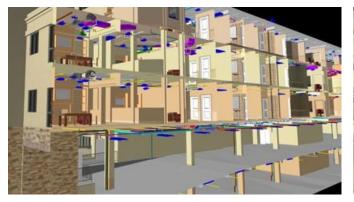

#### **COORDINATION WITH OTHER SERVICES**

### **CONSTRUCTION DOCUMENTATION**

Architectural Construction drawings are generated during the design development stage after the planning drawings are approved, & include details such as floor plans, elevations, sections, reflected ceiling, roof & site plan, detail sheets, GA & assembly drawings.

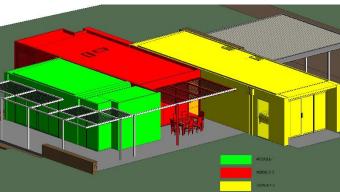

The comprehensive BIM models we produce in consultation with the client are embedded with necessary information, parameters and specifics to generate accurate construction drawings & documentation.

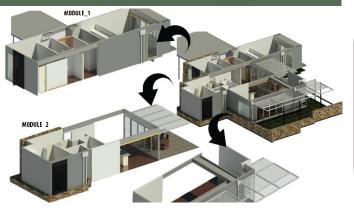

### **BIM FOR MODULAR & PREFABRICATED CONSTRUCTION**

BIM acts as the integration tool for individual modules of a prefabricated modular construction. It allows a perfect and seamless fitting of individual embedded components in the building

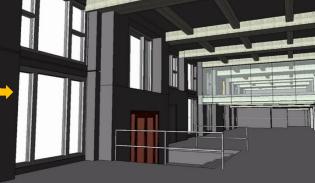

We create 3D BIM modules for visualization of individual modules & the entire building integrating all modules. The accurate drawings generated from the models give subcontractors precise measurements for the units to be prefabricated off-site.

#### SCAN TO BIM

A physical space or site is scanned by a 3d laser scanner to create an accurate digital representation of it. This representation can then be used for designing, assessing progress or evaluating option.

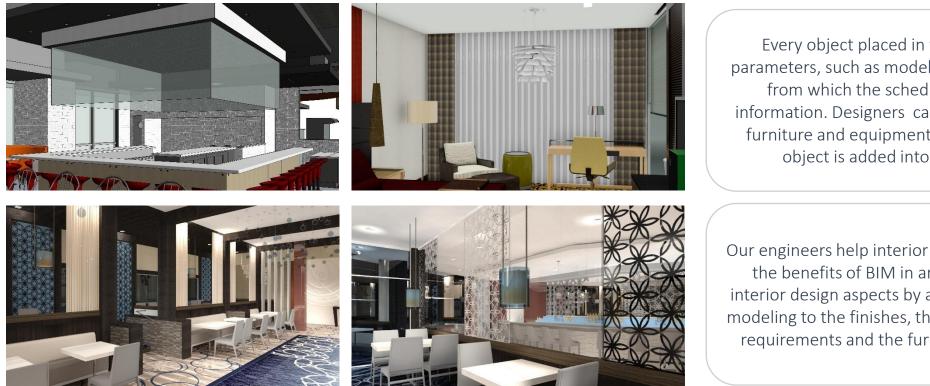

Scanned pointcloud file of an existing building is exported to a BIM platform by our experts to develop an accurate AS-Built model depicting the plumbing, walls, slabs, roof planes & terrains.

### **BIM FOR INTERIOR DESIGN & PROCUREMENT**

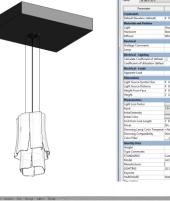

Every object placed in the model has parameters, such as model number and cost, from which the schedules pull their information. Designers can start scheduling furniture and equipment the moment an object is added into the model.

Our engineers help interior designers leverage the benefits of BIM in architectural and interior design aspects by applying intelligent modeling to the finishes, the fixtures, the area requirements and the furniture schedules.

BIM objects are a family of intelligent virtual 3D objects that provide detailed information of a product or component about its physical characteristics such as its geometry & visual graphical representation.

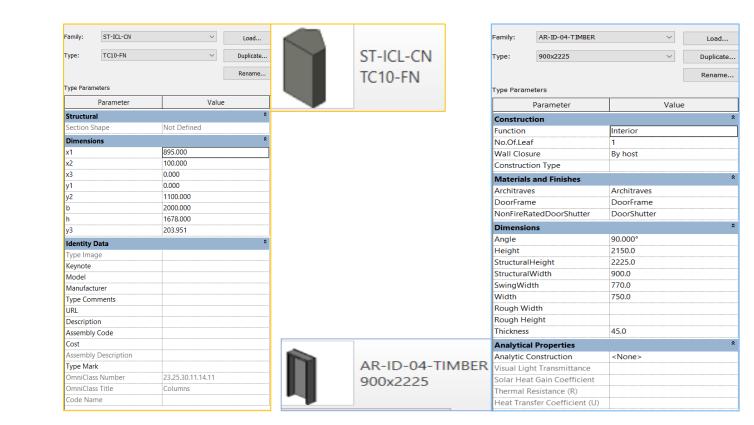

We provide parametric & non-parametric creation services for manufacturers, fabricators, architects & engineers for their product model catalogs, which can be downloaded directly by their customers from their websites..

#### **COBIE DATA FOR FACILITY MANAGEMENT**

Construction Operations Building Information Exchange (COBie) is a non-proprietary data format for the publication of a subset of building information models (BIM) focused on delivering asset data as distinct from geometric information

Advenser follows COBie process for managing FM model incorporating information such as the make, cost, warranty, contact records & required product specifications.

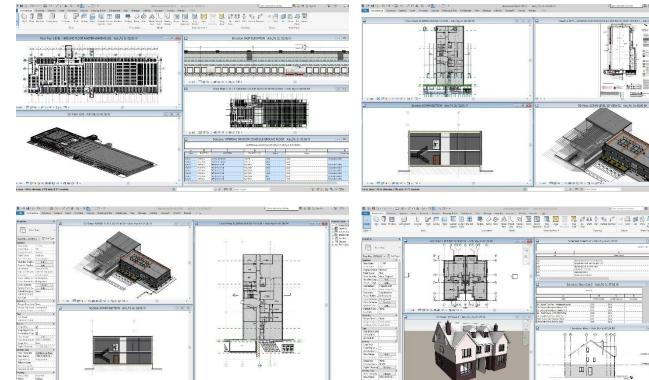

#### SITE & LANDSCAPE MODELING

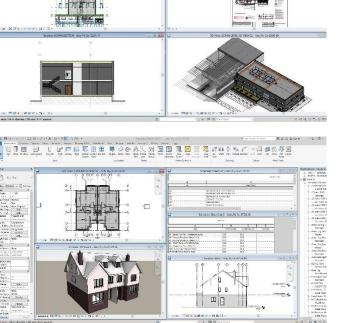

#### **QUANTITY TAKE-OFF**

Mage - Cash

BIM enables extraction of measurements and material quantities straight from models that help material procurement

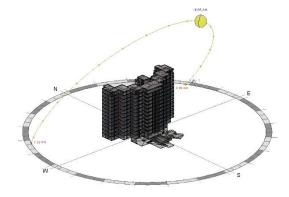

We can generate a list of all raw materials, parts, intermediates, sub-assemblies, etc., (with their quantities and description) required to construct, overhaul, or repair something

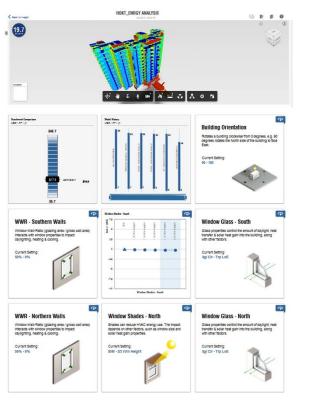

meanantera

#### **BIM FOR ENERGY ANALYSIS**

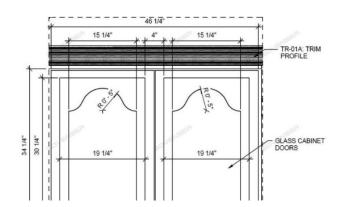

Energy modeling happens throughout the design process from concept through post-construction.

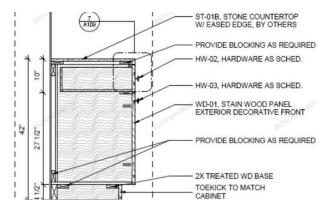

Advenser delivers models for energy analysis at the concept stage which has all spaces clearly defined and the model will be ready to be exported to gbXML format.

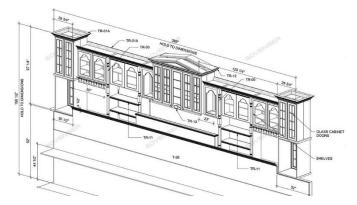

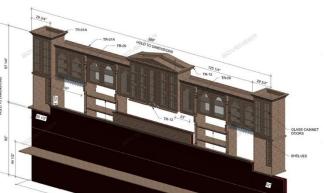

#### **MILLWORK DETAILING**

From a simple cabinet to a luxurious star hotel lobby, we offer you a one-stop solution to your millwork shop drawing needs.

We have the expertise to produce essential plans, floor plans, elevations, section details, finish and hardware schedules for all sorts of millwork design.

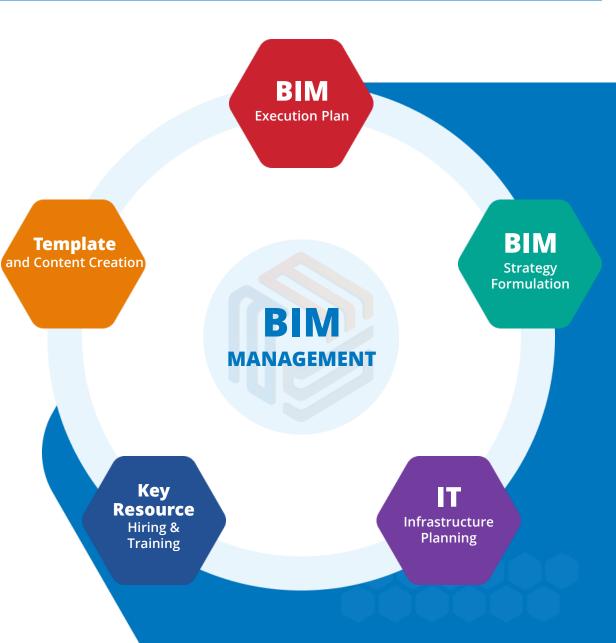

# **BIM CONSULTING SERVICES**

Since 2007, we have been assisting construction companies, general & specialty contractors in their migration to BIM from CAD. We act as a strategic BIM partner to the client educating and training them for seamless migration from CAD drafting to BIM implementation.

# **OUR DETAILING PROCEDURE**

# **OUR APPROACH**

**Understanding Client Requirements:** With every client, we understand that a different approach may need to be employed with every project, bringing a new set of skills and technology to the table. We devote the time needed to study the objective of the project.

**Delivering Solutions:** To achieve the goals of the project, our engineers adopt the most appropriate methods, outdoing themselves. Our work is to follow a system driven process incorporating the latest methods in the BIM industry which ensures projects are delivered on time and are nothing short of the highest quality.

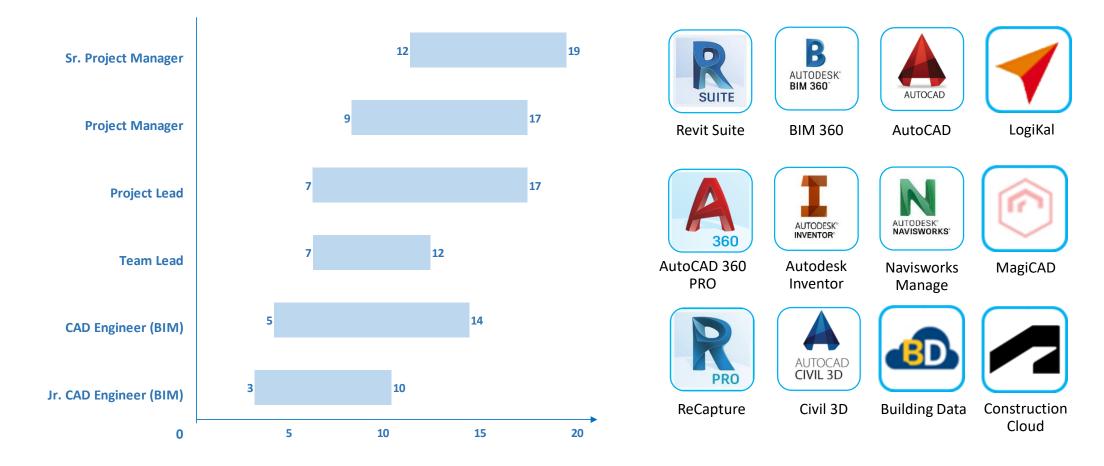

**Constant Improvement:** The engineering team, led by highly capable and seasoned project managers tirelessly learn, research and update themselves to meet the ever-changing and dynamic demands of the AEC industry. Systematic knowledge sharing and perfection of the work process is an ongoing process in Advenser. With every project, we see to it that we always make room for innovation.

**Our Promise:** Client satisfaction is a promise we assure and we measure our successes on par with that of our client's. We take pride in our past glory & achievements but at the same time strive to make them nothing more than mere milestones in our pursuit of excellence.
